Example of drawing for an Accessory Structure (shed or fence)

Provide a drawing of your proposed improvement

New single and Multi-family structures require a certified plot plan from a licensed engineer.

Drawing must include:

- Location of property lines
- Distance between property lines, accessory use and primary structure (home)
- Easements
- Right of way lines
- Utility lines
- Existing fencing and sidewalks

NOTE: The City of Edgerton does not perform or require property surveys. The approval of a permit by the City does not in any way absolve the owner from the requirement to ensure that accessory structures are fully contained within their property lines and not placed over an easement or right of way. Be advised that placing your accessory structure in an easement or right of way may result in the future removal at the property owner's expense.
