**Re: City of Edgerton
207th Street and Homestead Lane Improvements
(I-35 to Waverly Road)**

Dear Resident/Property Owner:

The City of Edgerton, Kansas is planning a street improvement project adjacent to your property. The project will involve constructing a 4-lane divided concrete street with curb, a 10-foot trail, enclosed storm sewer, and street lighting.

Miles Excavating and Affinis Corp. have been retained by the City to provide the engineering and construction necessary for this project.

Construction will begin August 20th 2018.

This project will be constructed in 3 phases, starting Monday August 20th, Phase 1 will begin. This will include clearing the trees off the new roadway alignment and the north two lanes of 207th Street. Miles Excavating will be working with residents to maintain access to their homes throughout the project.

The City of Edgerton uses NotifyJoCo to notify residents of traffic impacts from construction or road closures. Residents can text NOTIFYJOCO (all one word) to 888777 to begin receiving alerts on their mobile devices. NotifyJoCo is free to the public. Residents can identify up to five locations (work, home or school, for example) that they would like to receive alerts about. Besides text messaging, residents can sign up by visiting notifyjoco.org or, if they lack computer access, by calling 913.826.5555.

If you have any questions regarding this, please feel free to call any of the following people:
